HOMOZYGOUS POLLED!!! We think PB POLLED MISTY 123/3 (PP) is something extremely special due to her polled status, outstanding phenotype, and performance profile that charts moderate for Birth Weight EPD and in the top ½ of the breed for Growth, and Milk. Understand that this female will propel your polled program in one generation due to 100% of her calves being polled even when mated with a horned bull. Look at the complete design of this female that is deep ribbed, long, level, beefy, and heavy structured. The excellence of this breeding piece should be expected when you realize that she is out of the donor, PB Alexandra 107/0 (P), who sells as lot 1. Alexandra is the result of crossing one of the most proven polled red Brahman sires in the world, LMC LN Polled Pappo 136/6, with a proven dam that combines the top genetics from HK Cattle & 3X Ranch. The sire to Misty is Mr. JS Polled Horizon who was a many time winning show bull for Smith Brahman in Louisiana before we purchased him as our herd sire. Polled Horizon is sired by CT Polled Houston who is a son of +Mr. V8 279/7, the #1 polled sire in the breed based on registrations, and out of the #1 Register of Renown Cow in the breed, +CT Lady Rhineaux Ray 8/9. The dam to Polled Horizon is a daughter of the matriarch donor for Smith Brahman, +Miss JS Rouge 494/5. Many of our show winners have been sired by

Polled Horizon validating his siring ability. You might question why we are selling such a superior female and the answer is we strive to breed 100% polled red Brahmans. Take advantage of this opportunity!

Supplement Photo:

Lot 5-1: Sire – a many time show winner

Lot 5-2: Paternal Half Sister
